

I understand that the FCC is being approached to try to control the xm radio traffic and weather channels. I have only had my radio a short time, but I have love listening to the variety of XM stations. Plus the quality is not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I want to urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to continue to provide the kind of programming that I want.
